2009 MAPS BREEDING STATUS LIST

List all species ever encountered at the station!

Location: __ __ __ __ **Station:** __ __ __ __

Period Status Codes: Please record only the highest hierarchical breeding status observed during each period (C supercedes P and O; P supercedes O), and the appropriate daily sub-codes (hierarchically listed) describing the behavior or observation indicating that status (e.g., Cn, Pc, or Ob). If a species wasn't observed, use a '—'. If a station was operated two or more days in a period, record only the highest breeding status observed.

C = Confirmed Breeder	**P = Probable Breeder**	**O = Observed**	**— = Absent**
n = current year's nest found	**c** = courtship/copulation	**b** = banded/captured	
m = carrying nest material	**t** = other territorial behavior	**e** = encountered	
f = carrying food or fecal sac	**s** = song/drumming	**o** = flyover	
d = distraction display **l** = local bird present			

ENTER DATE (mm/dd) FOR INTENDED PERIOD BELOW

OBSERVER'S INITIALS												

BRSTAT: Cumulative breeding status for all previous years of operation

B = Regular Breeder (all years)
U = Usual Breeder (>½, not all, years)
O = Occasional Breeder (≤½ years)
T = Transient
A= Altitudinal Disperser
M = Migrant
? = Uncertain Species ID

2009 YEAR STATUS: Current year breeding status

B = Breeder
L = Likely Breeder
T = Transient
A = Altitudinal Disperser
H = Higher Altitude (than usual) Breeder
M = Migrant
E = Extralimital Breeder
? = Uncertain Species ID
— = Absent
