

## 2018 MAPS BREEDING STATUS LIST

### List all species ever encountered at the station!

**Location:** \_\_\_\_\_ **Station:** \_\_\_\_\_

**Period Status Codes:** Please record only the highest hierarchical breeding status observed during each period (C supersedes P and O; P supersedes O), and the appropriate daily sub-codes (hierarchically listed) describing the behavior or observation indicating that status (e.g., Cn, Pc, or Ob). If a species wasn't observed, use a —. If a station was operated two or more days in a period, record only the highest breeding status observed.

<b>C = Confirmed Breeder</b> n = current year's nest found m = carrying nest material f = carrying food or fecal sac d = distraction display    l = local bird present	<b>P = Probable Breeder</b> c = courtship/copulation t = other territorial behavior s = song/drumming	<b>O = Observed</b> b = banded/captured e = encountered o = flyover	— = Absent
